

Features type VITRUM III

Top hinge:

- By using a special hinge construction, the door is fixed into the headrail
- No hinges have to be put on the glass
- An additional front element is not necessary
- Optionally available with self-closing function and a soft-close damper for noise-free closing of the doors

Lower hinge:

- The matching part is fixed on the floor
- The door operates stable and durable by this central pin

Angle:

- The partition wall is connected to the front wall by means of restrained stainless steel brackets in the cubicle
- The screw connections are hidden very elegant by stainless steel cover plates

Connection rosettes:

- Connection rosettes made of stainless steel which are flush fitted into the glass enable an easy cleaning and are an absolute eye-catcher
